Dear Parent

As we approach the Christmas period, we are aware that there are a number of virus's circulating across Stockport, which could have similar symptoms such as a temperature, diarrhoea, vomiting, rashes etc.

Symptoms in children can be very non-specific, if your child is unwell and you do see a doctor then it is important to let the school or nursery know what the doctor has said the illness is in case this may be affecting other children at the school.

There is some general advice for common symptoms / infections which you should be aware of:

| Condition Symptoms Treatment Exclusion from setting Comments Gastroenteritis Diarrhoea and / or vomiting Encourage fluids to prevent dehydration Seek medical attention if not improving. Scarlet Fever Fever, sore throat Antibiotics (medical review required) Children should not return to the setting until they have been symptom free for 48hours Children can return to the setting 24hrs after starting antibiotic | |

There are a number of actions you as a family can take to prevent getting an infection during these winter months. These include:

- Vaccination for influenza (flu) or COVID 19
- Regularly washing your hands with soap and water or using alcohol hand gel if hands are visibly clean
- Using tissues to catch sneezes or runny noses, disposing of the and then washing your hands
- If anyone starts with symptoms that are not resolving, to seek medical attention
- Visit https://ukhsa.blog.gov.uk/2022/10/25/5-ways-to-protect-your-under-5s-this-winter/ for further information on the 5 ways to protect your family during winter.

Kind regards

Sarah Turner
